

Forum Chemical Technical Specification Sheet

Maleic Anhydride - MAN

HS Code 29171400

Parameter	Unit	Min/Max	Standard
Maleic Anhydride content	%	min	99.85
Crystallization temperature	C	Min	52.6
Mass fraction of ash	Ppm	Max	10
Iron content	Ppm	Max	3
Maleic acid content	%	Max	0.3
Colour heat stability	Hazen	Max	40
Initial colour*	Hazen	Max	20
Colour stabilizer**	Ppm	Max	18

* Solid MAN should be kept in absolute dry conditions

** Solution of CuC12 and ZnC12 salts in propylene glycol

Appearance and form

Solid, crystalized form in bricks

Application

MAN is used for the production of paints and varnishes, detergents, synthetic fibers and other chemical products.

Transportation

Palletized bags in standard containers
